Product description

New Zealand's full curding whole milk powder based Calf Milk Replacer, trusted by Kiwi farmers since 1966

Ancalf has a nutrient profile almost identical to raw whole milk, providing calves with the very best start to life.

Features and benefits

- High casein component for a good curd, for initial digestion and improved nutrient supply and uptake
- Fat from dairy sources, the only fat that contains butyrate, which is important in rumen development
- Actigen® prebiotic supports calf health by preventing some bad bacteria (gram negative bacteria) populating the intestine, enabling the gut to function more efficiently
- Coccistop® coccidiostat to help combat the effects of coccidiosis. Safe for dogs and horses.
- Specific vitamins and minerals to enhance calf development and health
- Suitable for automatic feeding systems

Not for human consumption

Nil meat withholding period

Not suitable for bobby calves; contains decoquinatone. Stand down period 12 hours

Quality testing

- Every batch thoroughly tested:
 - Curd test: good curd pass
 - Pathogens: non-detect
 - Composition: meets label claims
 - Foreign matter: non-detect

Suggested feeding guidelines

- Suitable from day 4 through to weaning
- Use in conjunction with Jumpstart™ Full Cream Colostrum from day 2-4:
nzagbiz.co.nz/nz/en/products/supplements/jumpstart
- Feeding rates are:
 - Twice daily, 150g/L
 - Once daily, 300g/L
 - For further information:
nzagbiz.co.nz/nz/en/animals/calves

Storage and handling

- Store at <25°C in a cool, clean, dry environment, away from direct sunlight
- Remove excess air in the bag and reseal tightly after opening
- Use within 12 months of opening
