# BIOSUPPORT™

## Typical analysis

Bifidobacterium Animalis	>10 <sup>9</sup> /g
Excipient	Dairy Milk Powder

## Product description

A powerful probiotic suspended in dry milk powder, designed by NZAgbiz and the Fonterra Research & Development Centre, to enhance the immune system and promote gut health of young animals.

## Features & Benefits

- Aids gut health and animal well-being
- Freeze dried powder format to retain good bacteria. The good bacteria lie dormant until introduced to liquid, minimising degradation
- Suitable to add to liquid milk or milk replacer from new born
- Bacterial count of one billion good bacteria per gram
- Good solubility and flow properties
- 100% dairy milk powder
- Readily digestible

## Not for human consumption

## Quality testing

- Every batch thoroughly tested:
  - Pathogens: non-detect
  - Foreign matter: non-detect

## Suggested feeding rates

- Can be fed from birth to weaning by mixing with warm milk or milk replacer. Do not feed directly to the animal.
- Feeding rates are:
  - Calf, lamb, piglet, goat kid: 1g Biosupport™ to 1 litre of warm milk (approx. 38°C),
  - For further information: [nzagbiz.co.nz/nz/en/products/supplements/biosupport.html](http://nzagbiz.co.nz/nz/en/products/supplements/biosupport.html)

## Storage and Handling

- For optimal performance, store product at 4°C or below in a cool, clean, dry environment, away from direct sunlight.
- Remove excess air in the bag and reseal the product tightly after opening.
- Best before 24 months from opening
